

Harish
732-798-5590
harishv9631@gmail.com

Professional Summary:

- Having 8 years of extensive IT experience in all phases of Software Development Life Cycle (SDLC) which includes development, design, analysis, testing and Integration of various web based and client/server applications in multi-platform environments with **JAVA/J2EE technologies**.
- Experienced in all phases of **Software Development Life Cycle (SDLC)** including Analysis, Design, and Development, Debugging, Support, Integration, Maintenance, and Enhancements of Java/J2EE Applications.
- Experience in building highly scalable distributed applications using Java, J2EE, Scala, Spring, Hibernate, Apache Solr, Mongo dB.
- Experience in working in environments using **Agile (SCRUM)** and Waterfall development methodologies.
- Expertise in client and server scripting languages like **HTML5, CSS3, JavaScript, Bootstrap, JQuery, Angular JS, ReactJS, Backbone.js and Node JS**.
- Experience with Java 8 features such as lambda expressions, Parallel operations on collections and for effective sorting mechanisms and new Date Time API.
- Handled operations and maintenance support for AWS cloud resources which includes launching, maintaining, and troubleshooting **EC2 instances, S3 buckets, Auto Scaling, Dynamo DB, AWS IAM, Elastic Load Balancers (ELB) and Relational Database Services (RDS)**. Also created snapshots for data to store in AWS S3.
- Experience in developing and solid understanding of Service Oriented Architecture and **Microservices Architecture**.
- Strong hands on experience in implementing Design patterns like MVC, Data Access Object, **Session Façade, Business Delegate, Factory, Proxy, and Singleton**.
- Experience in developing web-based enterprise applications using **Core Java, J2EE, Servlets, JSP, JSF, JDBC, Hibernate, Web Services (SOAP and REST), MVC Framework (Struts, Spring MVC) and SQL**.
- Experience in both providing and consuming Web Services using **SOAP and RESTful (JAX-RS and JAX-WS)**.
- Experience using persistence framework like Hibernate, JPA for mapping java classes with Database and using **HQL (Hibernate Query Language)**.
- Worked with Enterprise Integration Patterns like Apache Kafka to build real time data pipelines and streaming apps
- Strong experience in Core Java concepts like **Collections, Multithreading, Event Handling, Exception Handling, and Generics**.
- Experience with different Spring framework modules like **Spring Core, Spring AOP, Spring IOC, Spring MVC, Spring Boot, Spring Batch, Spring Security, and Spring cloud**.
- Experience in design and development of robust and highly scalable web service platforms and API's based on REST and SOAP for e-commerce applications **using AXIS, WSDL, UDDI,**

XML, JAX-WS, JAX-RS, JAXB, JAX-RPC technologies and Jersey frameworks.

- Expertise in XML technologies such as **XSL, XSLT, XML** schemas, **XPath, XForms, XSL-FO** and parsers like **SAX**.
- Experience on **CQL** (Cassandra query language), for retrieving the data present in Cassandra cluster by running queries in **CQL**.
- Proficient in writing and handling **SQL Queries, PostgreSQL queries, PL/SQL, Stored Procedures, and Triggers**.
- Good experience with Relational databases like **Oracle, My SQL, MS SQL Server, IBM DB2** and **No SQL databases like Mongo DB, Couchbase DB and Dynamo DB**.
- Experienced in implementation of **JMS** to exchange information over reliable channel in an asynchronous way by using **Active MQ, Rabbit MQ** as a message queue.
- Experience with application servers like **Web Logic, JBOSS, Apache Tomcat and IBM Web Sphere**.
- Good experience writing application deployment scripts using **Shell Scripting**. Worked on **Windows, UNIX, LINUX** platforms to move the project into production environment.
- Experience with **Junit, Jasmine, Karma, Mockito and Log4J** in developing test cases.
- Working knowledge with version control tools like **SVN, CVS, GIT, and Visual Source Safe**.
- Hands on experience in building tools like **ANT, Maven, Gradle**.
- Experienced in developing Rich GUI's by using Eclipse **RCP, HTML, frameworks**.
- Highly experience with Java complaint IDE's like **Spring Tool Suite, Eclipse, IntelliJ, and RAD**.

Education:

Master of science, Texas, USA

Technical Skills:

Programming Languages	Java, C, C++.
GUI Development Technologies	Java AWT/Swing.
Web Application Development	Servlets, Java Server Pages (JSP), Java Server Faces (JSF), Enterprise Java Beans (EJB), Struts, Spring, Hibernate, Java Web Start, Java Network Launching Protocol (JNLP), Java Threads (Concurrency / Multithreading),
Database Development	Technologies: SQL, PL/SQL, JDBC, NO SQL, Postgre SQL Software/Tools: MySQL, Oracle 9i/10g, Microsoft SQL Server, Microsoft Access.
Web Design Technologies/Tools.	JavaScript, CSS, HTML5, DHTML, XML, SOAP, HTTP, HTTPS, JQuery1.8, JQuery UI, REST, JAX-WS, XSL, XSLT, Angular JS, Backbone.js.
XML Technologies	XML, XSL, DOM, XML Schema, SAX, XSLT, WSDL, SOAP.
Application Servers/Web Servers	Apache Tomcat, Glassfish, JBoss, BEA WebLogic, IBM WebSphere.
Integrated Development Environment (IDE)	Net Beans, Eclipse, MyEclipse, JBuilder, JDeveloper, RAD, Spring Tool Suite (STS).
Version Control	SVN, CVS, VSS.
Testing Tools	JUnit, TestNG, SOAP UI, Selenium.

Professional Experience:

Intuit- San Diego, CA

March 17 – Till-date

Role: Java full stack Developer

Intuit Inc. is a business and financial software company that develops and sells the financial, accounting and tax preparation software and related services for small businesses, accountants and individuals. This project is aimed to improve the new help system of TurboTax. This new help system can be integrated into all products of Intuit

Responsibilities:

- Developed the J2EE application based on the **Service Oriented Architecture (SOA)**.
- Extensive use of core Java Collections, **Generics, Exception Handling, and Design Patterns** for functionality.
- Involved in writing Thread Safe blocks for multithread access to make valid transactions.
- Client Side code were written in AJAX and server Side Code were developed using MVC4.
- Developed Web Services **SOAP/HTTP, SOAP/JMS**, and SMTP using SOA technologies such as **SOAP, WSDL** and **UDDI** Experience with and solid understanding of Micro services.
- Worked on System security with the use of SSL (Secure socket layer), encryption and used role-based security.
- Used Spring IOC for dependency injection and Spring AOP for cross cutting concerns like logging, security, and transaction management.
- Used Encryption algorithms to provide security to the data.
- Expertise in developing reusable and interoperable Web service modules based on **microservices**, SOA architecture using **SOAP** and **RESTful**.
- Wrote SQL queries, stored procedures and enhanced performance by running explain plans.
- Worked in all the modules of the application which involved front-end presentation logic developed using Tiles with **Spring MVC, JSP, JSTL** and JavaScript, Business objects developed using POJOs and data access layer using Hibernate framework.
- Developed and tested Apache JMeter Java Request Sampler Plugins Extensions using methods inside of Linux Desktop Testing Project (LDTP) Java libraries for Graphical User Interface (GUI) Automation Testing.
- Developed Angular JS Controllers, html views, Services and factories for consuming REST API's and Math calculations modulus.
- Used complete annotation driven approach to develop the application using Spring Boot.
- Designed and developed Application based on Spring MVC Framework using MVC design pattern.
- Designed and Implemented SOA Architecture, Multithreading, using Spring MVC Framework, Spring Batch Coding involves Writing Controller Rest Controller, Service Layer and DAO Classes.

- Generated Scala and java classes from the respective APIs so that they can be incorporated in the overall applications.
- Writing entities in Scala and Java along with named queries to interact with database.
- Achieved synchronization of multiple threads through Multithreading and Exception Handling.
- Developed micro services using **Spring MVC, Spring Boot, Spring Cloud, Spring AOP** and Dependency Injection and JPA.
- Responsible for the implementation of application system with Core Java and spring framework.
- Created and injected spring services, spring controllers and DAOs to achieve dependency injection and to wire objects of business classes. Designed and Implemented REST web services using **JAX-RS, Spring REST**.
- Worked on Spring Quartz, form based authentication with Cross-Site Request Forgery CSRF token and secured REST endpoints with HTTP Basic authentication.
- Developed unit test cases using Jasmine and Karma and performed end to end testing using Protractor and Selenium.
- Used complete annotation driven approach to develop the application using Spring Boot and was also involved in setting up the Spring bean profiling.
- Used Hibernate Transaction Management, Hibernate Batch Transactions, and Hibernate cache concepts.
- Used AJAX extensively to implement front end /user interface features in the application.
- Build REST web service by building **Node.JS** Server in the back-end to handle requests sent from the front end JQuery Ajax calls.
- Database development required creation of new tables, PL/SQL stored procedures, functions, views, indexes and constraints, triggers and required SQL tuning to reduce the response time in the application.
- Focused on Test Driven Development (TDD) thereby creating detailed JUnit tests for every single piece of functionality before actually writing the functionality.
- Deployed application in **WebSphere** Application Server and developed using RAD.
- Coordinated with QA team for development of test plan, test cases, test code and responsible for defects allocation and resolution of those defects using Selenium.
- Implemented code according to coding standards and Created **Angular.JS** Controller Which Isolate scopes perform operations. Extensively used Core Java such as Exceptions, and Collections.
- Implemented Unit testing using **JUNIT**.
- Used Apache Maven for project management and building the application.
- CVS was used for project management and version management.

Environment: JAVA/J2EE, HTML, JSON, XHTML, JS, AJAX, JQUERY, DOJO, CSS3, JSP, Angular.JS, JavaScript, JSF,Node.JS, Microservices, Bootstrap, XML, XSLT, XPATH, MULE ESB, AWS, WebSphere, Unix/Linux, SOAP, REST, Spring Boot JMS, Maven, Drools 5, Eclipse, Jenkins, JUnit, MongoDB, Mockito, Star Team, TDD, Spring MVC, EMMA, JIRA, Spring framework DI, AOP, Batch, Hibernate, Cassandra, Docker, Ant, Coherence, Rally, Apache Camel.

The Vanguard Group is an American investment management company based in Malvern, Pennsylvania. It is the largest provider of mutual funds and now the second-largest provider of exchange-traded funds (ETFs) in the world, offering a full range of product solutions for individual investors, employers, institutions and intermediaries.

The project is an intra-net web application, which allows enrollment, member status, correspondence, fulfillment etc., for the existing and new customers.

Responsibilities:

- Involved in various phases of Software Development Life Cycle (SDLC) as requirement gathering, data modeling, analysis, architecture design & development for the project.
- Involved in development of services based architecture utilizing open source technologies like Spring MVC Framework.
- Developed user interface using JSP, JSTL and Custom Tag Libraries and AJAX to speed the application.
- Designed the front-end screens using AngularJS, HTML5, CSS3, JavaScript, JQuery, Bootstrap and Spring Boot.
- Involved in CQ5/AEM related design and framework development using templates, components widgets, CQ5 bundles, JCR/Sling API, configuring Cloud Services, publish and author set-up.
- Developed Angular controllers, services, filters and developed HTML templates with various Angular directives such as ng-app, ng-controller, ng-repeat, ng-if, ng-show, ng-hide, ng-change, ng-blur etc.
- Used various Angular UI Bootstrap components such as calendars, masks, uploaders, sliders, alerts, modal dialogs etc. for developing the UI.
- Developed Angular services making use of resource service to perform REST API calls to the backend.
- Developed reporting dashboards, which processes large amount data that are stored in Elastic Search and My SQL platforms and generates reports and displays in dashboards.
- Identified and created indexes, mappings and data in Elastic search and used Elastic Search REST API's both single and multi-document API's. API's like Index, Multi Get, Bulk etc.
- Used various aggregations like Metrics, Average aggregations in Elastic Search.
- Developed unit test cases using Jasmine and Karma and performed end to end testing using Protractor and Selenium.
- Developed REST controllers using Spring Data REST to serve the UI with required JSON data.
- Extensive knowledge on AWS EC2, Amazon S3, Amazon Elastic Load balancing and other parts of AWS infrastructure.
- Worked on AWS multi factor authentication (MFA) related to security groups including rest security.
- Configured and tuned the AWS EC2 and worked on ELB, Route53 for high availability.
- Implemented Micro services architecture using Spring BOOT enabled REST API with the Spring Cloud modules.

- Worked on Integration of MicroServices deployment patterns with the PAAS platform on top of AWS and Integrating with the Config server and ZUUL proxy.
- Experience on configuring auto scalable and highly available MicroServices set with monitoring and logging using AWS, Docker, Jenkins and Splunk.
- Developed REST exception handling controller advices to respond to bad requests and server side exceptions.
- Used complete annotation driven approach to develop the application using Spring Boot and was involved in setting up the spring bean profiling.
- Used REST Client and POSTMAN to test the rest based services and used Junit and Mockito to test the middleware services.
- Used Hibernate in the persistence layer and implemented DAO's to access data from database.
- Used Node.js to run Grunt tasks and build properly the project (compile, minify, concat etc.) and Implement modules into Node JS to integrate with designs and requirements. Used GruntJS, BowerJS, Express from NodeJS.
- Involved in enhancing existing MEAN (MongoDB, Express, Angular and Node) stack applications and provided the required support.
- Involved in configuration and usage of Apache Log4J for logging and debugging purposes. Used RAD as IDE tool to develop the application.
- Prepared Documentation for Unit Test Plan and Unit Test Results for the QA purpose
- Participated in the release night shakeouts/over night deliveries and QA Support.
- Took part in setting up the application with Jenkins and AWS and is involved in builds and deployments to Tomcat server.

Environment: Java, STS, Tomcat, Spring Tool Suite, Spring, Spring Boot, Hibernate, Elastic Search, RESTful Web Service, Oracle, HTML5, CSS3, JQuery, AngularJS, Express, JavaScript, GIT, JMS, Psotgre SQL, Agile, JIRA tool, Selenium, Log4j, Maven, AWS , Docker , OAuth2 , Cloud Foundry , Kubernetes , Splunk , Dyntatrace , Apache Kafka , React , Node JS , Jenkins , Cassandra , Couchbase , Hazelcast , Mule API Gateway , Cucumber JVM.

WALMART, Carlsbad, CA
Role: Java Developer

Feb 14 – July 15

The project involved enhancement of POS System to meet new business requirements. Enhancement includes integration of middleware with new POS Credit Card Processing System and development of new web services integrated to POS functionalities.

Responsibilities:

- Involved in the design and development phases of Agile Software Development.
- Developed the application using Spring Framework that leverages classical Model View Controller (MVC) architecture.
- Implemented Business processes such as user authentication, Account Transfer using spring 4 beans in the service layer.
- Developed complete Web tier of the application with Spring MVC framework.
- Extensively used Hibernate framework for Object Relational Mapping.

- Developed JUnit based unit test classes.
- Responsible for implementing the workflow and business process management of our application using Activity BPM Platform.
- Used Apache Kafka for producing the change events from SQL and the Node JS programs to consume events as per the change events.
- Used Apache Kafka High Level consumer and High-Level producer for the programs
- Developed GSP pages for rendering views in Grails Framework.
- Developed and implemented GUI Functionality using GSP, Groovy, and AJAX, Javascript, JQuery.
- Used Hibernate to take care of the mapping from Java 8 classes to database tables and for querying data using Hibernate query language (HQL).
- Developed automation test scripts using Selenium Web Driver and Java.
- Performed repetitive tasks like modification, building, compiling, unit testing using Grunt.
- Involved in implementing spring dependency injection for a maven project using Annotation.
- Involved in developing web application using Spring MVC & Cloud integrated with Thymeleaf.
- Experienced being a scrum master in our Scrum Method of Agile Software Development.
- Used Git for version control our application.
- Developed UI using the HTML5, CSS3, Angular JS and React JS with Node JS and Express JS backend.
- Written test scripts for the components developed using React JS.
- Used Spring modules (annotations) i.e. Spring Core, IOP, AOP, Security, Spring batch and Spring boot.
- Built a RESTful Web services to save and retrieve geolocations using a remote server in Java 8 using Spring MVC, MongoDB.
- Developed views using the HTML, CSS and javascript components of Bootstrap framework.
- Experienced using Maven, Gradle for auto uniform building of our project.
- Experienced in writing dynamic queries on documents of Mongo DB using a document -based query language.
- Experienced in unit testing using Junit.
- Deployed and configured the data source for database in Web sphere application server
- Involved in implementing authentication and authorization to our application using spring security.
- Used Bean validation for User Input Validation, Error handling, java 8 Bean management and Event handling. Implemented Spring Beans using IOC and Transaction management features to handle the transactions and business logic.
- Developed one-many, many-one, one-one annotation based mappings in Hibernate.
- Implemented Logging framework using Slf4J with Log4J as back-end.
- Used Java 8 Messaging Services (JMS) and Backend Messaging for reliable and asynchronous exchange of important information.
- Developed the Maven build file for preparing WAR files used to deploy application.
- Written PL/SQL in Oracle Database for creating tables, triggers and select statements.

Environment: Java ,J2EE , JSP, Spring, Hibernate, JMS, JNDI, Oracle, Spring Boot, HTML5, XML, RAD, WebSphere, Bamboo, Maven, Gradle, Git, Slf4J, Log4j, JUnit, jQuery UI , CSS, JavaScript, Unix and Oracle 11g, Bootstrap Framework.

Ebay Inc, Austin, TX
Role: Java Developer

March 12 – Feb 14

Ebay is a leading US based E-commerce Company providing consumer to consumer and business to consumer service sales through internet. The project is about developing the pre-existing SDF framework and exposed multiple web services where procurement/order delivery /shipping related details and will further parsing and persisting the response to the database will help to track the delivery, shipping, payment related information.

Responsibilities:

- Involved in SDLC development including Requirements gathering, Analysis, Design
- Implementation and Testing of application using Agile Methodologies.
- Developed web application using Spring MVC framework.
- Used Spring Inversion of Control to make application easy to test and integrate.
- Used Auto wired POJO and DAO classes with Spring Controllers.
- Implemented Web Design based on HTML5, CSS3 and Bootstrap for Front-End and JSP, JSF for Back-end.
- Functionalities include writing code in HTML, CSS, JavaScript, JQuery, Ajax, JSON, AngularJS, and Bootstrap with MySQL database as the backend.
- Developed Web application for backend system using AngularJS with cutting edge HTML5 and CSS3 techniques.
- Utilized spring annotations and XML configuration for Dependency Injection.
- Implemented web services for communicating by using SOAP and RESTful.
- Provided connections using Spring JDBC to the database and developed SQL queries to manipulate the data.
- Used Spring DAO concept in order to interact with database using JDBC template.
- Implemented some applications by using Object Oriented Programming concepts, Multi-Threading, Exception Handling, and Collections while developing the project.
- Used Log4j to print the logging, debugging, warning info on the server console.
- Used Web Sphere Application Server for building, testing and deploying application locally.
- Used IBM ClearCase for version control.
- Used CodePro Analytics to make sure all the code maintain standards.
- Interacted with testing team to fix defects.
- Involved in bug fixes, enhancements and code refactoring.

Environment: Java, JDBC, JSP, JSF, HTML, CSS, JavaScript, Angular JS, DOJO, JQuery, Bootstrap, AJAX, JSON, SOAP, RESTful, JAX-WS, Spring Framework , RAD , Web Sphere Application Server , MySQL, Eclipse, Log4j, IBM ClearCase, etc.

Apollo Hospitals, Hyderabad, India.
Role: Java Developer

Feb 11 – March 12

Apollo Hospitals Group, today, is an integrated healthcare organization with owned and managed hospitals, diagnostic clinics, dispensing pharmacies and consultancy services. In addition, the group's service offerings include healthcare at the patient's doorstep, clinical & diagnostic services, medical business process outsourcing, third party administration services and health insurance. To enhance performance and service to customers, the company also makes available the services to support business, telemedicine services, education, training programs & research services and host of other non-profit projects.

Responsibilities:

- Technical analysis, design, development, and documentation with a focus on the implementation and agile development.
- Involved in Design, Development, Testing and Integration of the application.
- Implementing business logic and data base connectivity.
- Client side installation and configuration of project.
- Developed using simple Struts Validation for validation of user input as per the business logic and initial data loading.
- Co-coordinated Application testing with the help of testing team.
- Writing database queries on Oracle 10g.
- Writing stored procedures, Packages, Views, Cursors, Functions and triggers using SQL in the back end.
- Used Hibernate for Object Relational Mapping (ORM) and data persistence.
- Wrote SQL commands and Stored Procedures to retrieve data from Oracle database.
- Developed webservices using SOAP, WSDL, and XML.
- Developed the application using Singleton, Business Delegate and Data Transfer Object design patterns in the project.
- Created and implemented Oracle Stored Procedures, Functions, Triggers and complex queries using SQL.
- Worked with Java Messaging Services (JMS) for reliable and Asynchronous Communication.
- Used log4j for logging and SVN for version control.
- Ability to quickly adjust priorities and take on projects with limited specifications.

Environment: Java, JSP, Struts, CMS, Spring, SOAP Web services, SOA, JavaScript, CSS, XML, JAX RS XHTML, XSLT, JMS, Ajax, Hibernate, EJB, Log4j, Oracle 10g, Web Sphere, Ant, RAD, Eclipse, UNIX, Perl.

Techno soft Solutions, Hyderabad, India
Role: Java Developer

March 09 - Feb 11

Techno soft provides a range of professional services delivered by experts with operational experience building and running the largest E-Mail, messaging, and Internet networks. These services range from architecture and design of software solutions, website design & development to deployment services and operational support.

Responsibilities:

- Involved in Requirement Analysis, Design, Development and Testing of the risk workflow system.
- Involved in the implementation of design using vital phases of the Software development life cycle (SDLC) that includes Development, Testing, Implementation and Maintenance Support in WATER FALL methodology.
- Created user-friendly GUI interface and Web pages using JSP, JSF, HTML, CSS, AJAX, JavaScript and jQuery.
- Involved in component development using J2EE principles and used design patterns such as Singleton, Factory, JSF and Data Access Object (DAO) in the implementation of the application.
- Responsible for designing, coding and developed the application in J2EE using Struts MVC.
- Implemented Struts framework (Action & Controller classes) for dispatching request to appropriate classes.
- Used simple Struts Validation for validation of user input as per the business logic and initial data loading.
- Achieved synchronization of multiple threads through Multithreading and Exception Handling.
- Extensively used JSON to parse the data from server side to satisfy the business requirement.
- Developed Struts Action Forms, Action classes and performed action mapping using Struts.
- Developed RESTful and SOAP based Web Services to consume and produce data in XML and JSON.
- Consumed Web Services to interact with other external interfaces to exchange the data in different forms by using RESTful service.
- Established Database Connectivity using JDBC for MySQL.
- Written SQL queries, PL/SQL store procedures and Triggers to fetch and store data from the database.
- Used Log4J for application logging and notification tracing mechanisms.
- Developed the ANT scripts for preparing WAR files used to deploy J2EE components and deployment of the application was on Jetty.
- Prepared JUnit test cases and executed the test cases using JUnit.
- Involved in bug fixing during the System testing, Joint System testing and User acceptance testing.
- Used GIT to check-in and check-out and co-ordinate among team members for Version Controlling.
- Used NetBeans IDE to integrate different frameworks to build application.

Environment: Java, HTML, CSS, AJAX, jQuery, JavaScript, Struts, Web Services, SOAP, RESTful, JSON, XML, JDBC, SQL, MySQL, ANT, Eclipse, JIRA, GIT, Jetty and UNIX.
